PROFESSIONAL SUMMARY

GIS Analyst with experience in geospatial analysis, aerial thermography, remote sensing, drone imagery processing, and Web GIS workflows for renewable energy and infrastructure projects. Skilled in ArcGIS, QGIS, Global Mapper, Pix4D, Agisoft Metashape, and AutoCAD for spatial analysis, orthomosaic generation, mapping, and geospatial data management. Completed Web GIS Development certification with practical knowledge in HTML, CSS, JavaScript, and ArcGIS JavaScript SDK for developing interactive web mapping applications and geospatial visualization solutions.

TECHNICAL SKILLS

GIS Software: ArcGIS, QGIS, Global Mapper, AutoCAD 2D

Photogrammetry Tools: Pix4D, Agisoft Metashape

Web GIS Technologies: ArcGIS JavaScript SDK, HTML, CSS, JavaScript

Geospatial Skills: Spatial Analysis, Remote Sensing, Orthomosaic Generation, Drone Image Processing, Georeferencing, Digitization, Thermal Image Analysis, CAD Data Checking

PROFESSIONAL EXPERIENCE

GIS Analyst

Nov 2024 – Sep 2025

Datasee.AI

Chennai, Tamil Nadu

- Performed aerial thermography analysis using drone-based thermal imagery for solar infrastructure inspection and defect identification workflows.
- Supported solar construction and progress monitoring through orthomosaic generation, change detection, and spatial visualization processes.
- Processed and analyzed spatial datasets and geospatial information for infrastructure and mapping projects.
- Conducted spatial analysis and thematic map preparation using ArcGIS, QGIS, and Global Mapper.
- Maintained spatial data accuracy, attribute management, and consistency across GIS workflows and reporting activities.

GIS Intern

Aug 2024 – Nov 2024

Datasee.AI

Chennai, Tamil Nadu

- Performed digitization, georeferencing, and spatial data editing using GIS software tools.
- Managed spatial datasets and attribute tables for geospatial analysis and mapping workflows.
- Prepared thematic maps and assisted in GIS visualization for renewable energy projects.

PROJECT

Integrated Watershed Management for Suruliyar Watershed Using Geospatial Technology

2024

Academic Project

Tiruchirappalli, Tamil Nadu

- Developed a watershed management study using geospatial technology and remote sensing techniques for sustainable environmental analysis.
- Analyzed groundwater potential zones, soil erosion, and surface runoff using spatial analysis and thematic mapping methods.
- Prepared land use, drainage, and watershed thematic maps using ArcGIS and QGIS for environmental planning and resource management.

EDUCATION

B.Tech in Geological Technology and Geoinformatics

2020 – 2024

Bharathidasan University

CGPA: 7.5

CERTIFICATIONS

• Web GIS Development Certification – HexaMap Academy

Completed practical training in HTML, CSS, JavaScript, and ArcGIS JavaScript SDK for developing interactive Web GIS applications and web mapping solutions.

LANGUAGES

Tamil (Native), English (Professional)
